

Interconnection Formal Pre-Application

Customer Information

Name:

Company:

Phone:

Email:

Proposed Interconnection Location

Address:

City, State Zip Code:

Proposed Interconnection Information

Size of proposed project:

Ground mount or roof top (choose one):

Panel Information

Manufacturer:

Number of Panels:

Nameplate Rating in Watts:

Inverter Information

Manufacturer:

Inverter Model Number:

Number of Inverters:

Inverter Size KVA:

Inverter Configuration:

Main Entrance Size:

Meter Serial Number of existing customer meter to be interconnected:

Magnitude and duration of the fault current generated by The Renewable Energy System-AC Output Inverter

AMPS:

Seconds:

Voltage at Which the above Fault Current is Generated at:

Comments or Additional Information:

Please email this application and all supporting documentation including one-line diagram and consent releases to bhesolar@blackhillscorp.com

The provided information does not guarantee that an interconnection may be completed. Data provided in the pre-application report may become outdated at the time of the submission of the complete interconnection request. The pre-application report shall be non-binding on the utility and shall not confer any rights to the interconnection customer.
